### Work Experience

---

Everest Instruments Private Limited

Mobile Application Developer

2022

- Produced clean, maintainable, and testable code with flutter SDK. Reduced average development time by 20-30%
- Conducted testing and bug fixing periodically. Identified client requirements and developed new features or modified existing features

Appnix Technologies

Mobile Application Developer Trainee

2021

- Developed 2 in-house mobile apps which improved the organization's portfolio in flutter app development
- Built flutter PWA apps with faster response time and fully responsive in all supported browsers
- Learned dart and flutter core concepts, basic state management, and complex UI designing

### Education

---

Sankalchand Patel University

8.33 CGPA

- Bachelor of Technology in Information Technology

June 2022

Gujarat Technological University

8.89 CGPA

- Diploma in Information Technology

June 2018

### Projects

---

Creamy Plus

- A farmer milk collection report application where users can observe reports, billing, summary, initiate queries, sell and purchase dairy/agriculture products
- Reduced 50% dependency on regional managers in client business hierarchy. This helps the end user to save time, and effort and improves client business operations

Proveera

- An e-commerce application for the whole seller to sell 'Made in India' products on a global scale
- The MVP app helped the client to raise funding from the government of India

Militrade

- A social media application for those who like to preserve antique and old artifacts like old military weapons, medals, scriptures, maps, etc.
- Improve the response time of the app to improve user experience. Also, migrated database with the high complexity of schema which, reduced the server management cost of the client by 15%

### Personal Projects

---

InWiz

March 2022- June 2022

- An Invitation Management application by which users can create, send and maintain records of guests and make arrangements according to the number of guests arriving

## DigiFarm

August 2021 – March 2022

- An E-commerce with Yield Prediction tool for farmers to purchase agriculture-related products online directly from manufacturers. Also, predict yield based on soil test report parameters

## Spendid

August 2021 – Present

- An Expense Tracker and Budget Management application in the personal finance category. This will help me personally be aware of my income and expense.
